

ER DIAGRAM:

CONTRIBUTION:

1. Anisha Prakash (2021CSB1067)

- Database Management
- Appointment Allocation
- Java Programming

Contribution to the Project:

- Designed and implemented the database schema for efficient data storage and retrieval.
- Developed the appointment allocation system, ensuring a smooth and organized process.
- Made the sql file for entering data into our database.

2.Shiva Koshta (2021CS1132)

- Triggering
- Java Programming
- Appointment Allocation

Contribution to the Project:

- Implemented triggers to automate specific actions and enhance system responsiveness.
- Developed key project components using Java, contributing to the overall system architecture and functionality.
- Contributed to the debugging of the whole Java code.

3. Alam (2021CSB1271)

- ER Diagrams
- SQL Insert Functions
- Java Programming

Contribution to the Project:

- Designed the Entity-Relationship (ER) diagram to model the project's data structure.
- Implemented SQL insert functions to ensure seamless data insertion into the database.
- Contributed to the Java programming aspects of the project, enhancing its overall functionality.
